

# Ghost Stories

stray thoughts on photography & film

by **Pavel Büchler**

edited by Giles Lane and Brandon LaBelle  
 designed by Louise Sandhaus  
 published by Proboscis, London 1999

A provocative collection of writings by the artist and educator, Pavel Büchler, focusing on the magic, 'spectral' aspects of photography and the moving image.

*Ghost Stories* brings together articles and essays written between 1986 and 1998 for magazines and catalogues as well as a number of previously unpublished texts.

Featuring reflections on the work of, among others, Rebecca Horn, Craigie Horsfield, Roger Palmer, Jim Harold, Tim Brennan and Tracey Moffat.

Pavel Büchler is Professor of Art & Design at Manchester Metropolitan University.

"...storytelling, enthusiasm and flights of satiric fantasy expressive of a sceptic's love of the world... a constant duty of criticism and attention."

"...richly metaphoric, open-ended critical/theoretical texts. ...his writing involves risky, gravity-defying 'intellectual leaps'..."
